Office Action Summary	Application No. 10/733,554	Applicant(s) MOLZ ET AL.	
	Examiner James L. Swiger	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Claims 5-7, and 13-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/1/2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 8-12 and 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Atkinson et al. (US 6,402,750). Atkinson et al. disclose a surgical implant for the spine having a first and second biocompatible implant (see Fig. 4b) that is capable of attachment to the superior and inferior vertebrae, respectively, and that are biocompatible (See Col. 14, lines 35-55). The two attachment devices also provide a distracting force enabling proper spacing between the first and second pedicles. The implants may also provide a compressive force. (See Col. 9, lines 28-43.) The device of Atkinson et al. also teaches a prosthetic device that has a means for providing posterior devices (See Col. 23, lines 44-46), and a means for adapting one or more of the devices to the first and second transverse processes for spinous processes for attachment to laminae (as an adjustable arm 114), a means for removing at least a

Art Unit: 3733

portion of the facet joint (see Col. 13, lines 34-44, inherently describing the use of the drill that removes a portion of the joint for securing the prosthetic device).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkinson et al. '750 in view of Zucherman et al. (US 6,652,527). Atkinson et al. disclose the claimed invention except for a surgical implant with a joint component enabling the first and second biocompatible members to rotate relative to one another. Zucherman et al. disclose a joint component (102 and 103) that permit the spinous processes to move relative to one another (see Col. 4, lines 8-29). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Atkinson et al. having at least a joint between the attachment devices in view of Zucherman et al. to allow the two portions to better orient with each other in use.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See pto-892.
